

LES SIGNES POSSIBLES DE CANCER DU SEIN

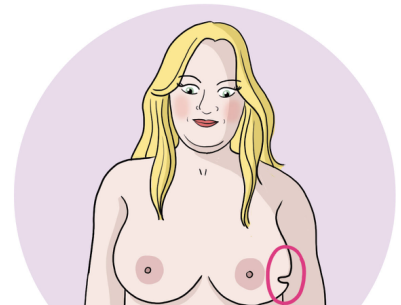

C'est important de bien connaître sa poitrine en l'observant régulièrement

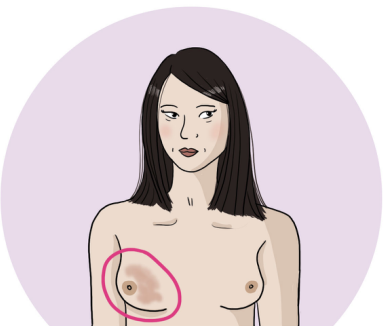

Apparition d'une masse anormale

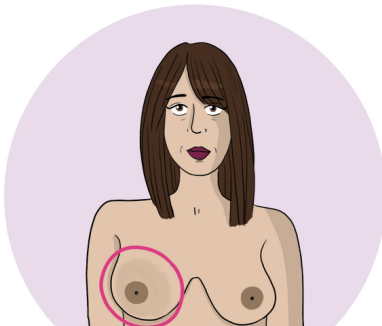

Changement de forme ou de taille

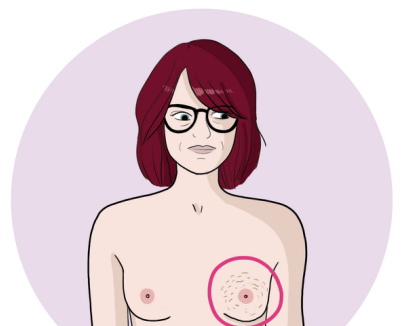

Fossettes, creux ou replis vers l'intérieur

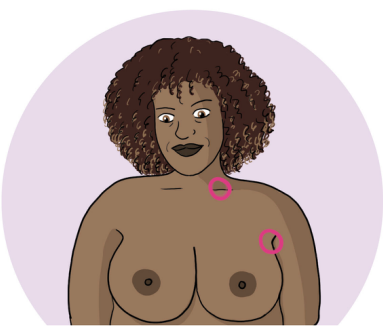

Rougeurs

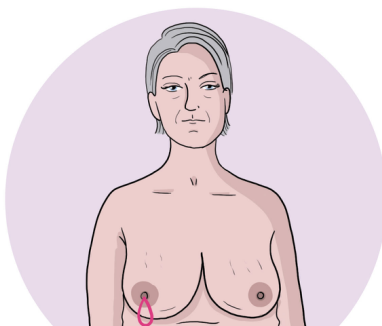

Épaississement de la peau

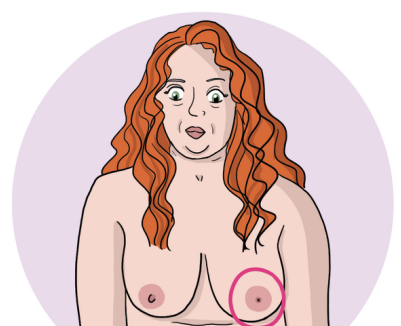

Effet peau d'orange

Modification des ganglions lymphatiques

Écoulement

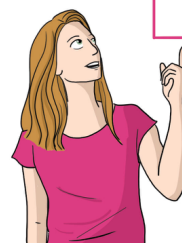

Modification du mamelon ou de l'aréole

Le but n'est pas de vous alarmer mais de vous aider à repérer rapidement des changements

En cas de doute...
